

Celebrate our past as we face the future...

The Bazelon Center for Mental Health Law is the leading national legal advocate for people with mental disabilities. Since its founding in 1972, the nonprofit organization's precedent-setting litigation and public-policy advocacy has successfully challenged many barriers and expanded access to public schools, workplaces, housing and many other opportunities for community life. Today we work to end the punishment of children and adults for the failures of neglectful public mental health systems and to achieve full membership in the community for all people with mental disabilities.
